The top screenshot shows the Postman interface for the 'GET getRequest-Demo' endpoint. The URL is 'https://reqres.in/api/users?page=2'. The 'Query Params' section shows a table with 'page' set to '2'. The 'Body' section shows a JSON response in 'Pretty' format:

```
1 {
2   "page": 2,
3   "per_page": 6,
4   "total": 12,
5   "total_pages": 2,
6   "data": [
7     {
8       "id": 7,
9       "email": "michael.lawson@reqres.in",
10      "first_name": "Michael",
11      "last_name": "Lawson",
12      "avatar": "https://reqres.in/img/faces/7-image.jpg"
13    },
14    {
15      "id": 8,
16      "email": "jane.doe@example.com"
17    }
18  ]
19 }
```

The bottom screenshot shows the same Postman interface, but with the 'page' query parameter set to '2'. The 'Body' section shows the same JSON response. Below the Postman interface, a browser window is visible showing the OpenWeather website.

Built-in API request by city name

You can call by city name or city name, state code and country code. Please note that searching by states available only for the USA locations.

API call

```
https://api.openweathermap.org/data/2.5/weather?q={city name}&appid={API key}
```

```
https://api.openweathermap.org/data/2.5/weather?q={city name}&appid={API key}
```
